

While you slept, the whole business got rebranded to **Peak 11 Media** and built into a turnkey, end-to-end machine. Here's the full night, then the short list of what only you can do.

16 LIVE DEMOS	13 PLAYBOOKS	~290 VERIFIED LEADS	\$900 +\$49/mo OFFER	\$5K/mo GOAL
-------------------------	------------------------	-------------------------------	------------------------------------	------------------------

THE NIGHT IN ONE GLANCE

- **16 live demo sites** across 10+ trades, all verified 200 — each doubles as a warm lead.
- **New QR digital-menu add-on:** reusable template + a live Ogie's Cafe demo menu + a printable static QR — a sellable \$150–300 restaurant upsell.
- **13 branded playbooks/SOPs** — a new hire could run the entire lead→cash machine from them.
- **~290 verified leads** in the pipeline (Batches 1–4), every website status checked.
- **Sales system + free CRM** — scripts, sequences, intake form, deal tracker + HTML pipeline view.
- **Financial model + hiring plan + automation map** — the \$0→\$5k→\$20k/mo path to a near-passive business.
- **Restaurant research verdict** delivered: QR menus = do now, build-your-own ordering = skip, resell Square = later.

LOG What got built — mission by mission

M1 · Rebrand & Core System

- Rebranded 20+ customer-facing assets Forge Media → Peak 11 Media (demo footers, call sheet, 23 email signatures, pricing, intake, proposal, galleries). Mailing address set (Murray, UT).
- Legal docs regenerated as Peak 11 Media — service agreement, refund policy, care-plan terms (HTML + PDF). Care plan set at \$49/mo.
- Master Operations Playbook (19 pages) + Build Runbook — the full lead→cash system a new hire could run.

M2 · Portfolio Expansion

- 6 new v3 demo sites built on real SLC businesses (med spa, dental, landscaping, restaurant, hair salon, martial arts) — each is both portfolio proof and a warm lead. All live (200).
- Portfolio now spans **16 demos across 10+ trades**. Review page rebuilt; live rebrand confirmed — zero 'Forge Media' left on the live site.

M3 · Lead Engine

- 135 new verified leads added with every website status actually checked (fixing the earlier misclassification). 30 P5 / 75 P4 across all 6 metro regions.
- Lead-Gen & Verification SOP written (NONE/FB/DEAD/BAD/GOOD rubric) — the pipeline is now repeatable.

M4 · Sales System + CRM

- Sales Scripts & Sequences (per-trade cold call, objection library, show-and-close, 3-touch email, SMS/consent), Onboarding templates, and a Follow-Up & Deal-Flow SOP.

- Free CRM / deal tracker (Pipeline / Clients / Dashboard tabs, MRR + close-rate formulas) plus a readable HTML pipeline view, and a client intake form.

M5 · Delivery & Management Ops

- Domain & Go-Live SOP (client's own domain → GitHub Pages DNS, HTTPS, QA) + reusable one-command deploy tooling.
- \$49/mo Management & Retention SOP (the near-zero-effort edit workflow, MRR-at-scale math) + Payments & Collections SOP (Stripe products/links, money flow).

M6 · Scale & Passive Prep

- Hiring & Delegation Plan (commission closer + VA, comp ranges, org evolution solo→+closer→+VA, each hire funded by revenue).
- Financial Model (PDF + editable xlsx): \$0→\$5k→\$20k/mo, MRR compounding to ~100 care plans ≈ \$4,900 MRR, hire break-evens.
- Automation & Passive-Income Map: what's AI-automated vs human-only, the roadmap to a near-passive end state, and the guardrails.

M7 · Peak 11 HQ + Morning Report

- Peak 11 HQ dashboard — the single private front door linking everything (portfolio, playbooks, leads, CRM, financials, contracts, sales tools, research, live status).
- This Morning Report. QA: all 16 live demo sites verified 200.

M8 · QR-Menu Add-On + Lead Batch 4

- **QR digital-menu add-on built and shipped** — a reusable, self-contained template (one file, no build step, ~\$0/mo). Sells as a \$150–300 one-time restaurant upsell.
- **Live Ogie's Cafe demo menu** deployed at consciousmirage.github.io/forgedemos/demo-restaurant-v3/menu/ — full menu, allergen chips, Popular badges, tap-to-call. A real visual 'yes' for restaurant calls.
- **Static QR code** generated pointing at that stable URL — print once, edit the menu forever without reprinting.
- QR Menu Add-On playbook (PDF) written — **playbook library now 13 PDFs**.
- **Lead Batch 4: 50 new verified prospects** (29 Facebook-only, 14 none, 5 bad, 2 dead; 16 P2 / 33 P3) — heavy in West Valley, Ogden, Davis County. **Pipeline now ~290 verified businesses**.

RESTAURANT RESEARCH — VERDICT

- **QR digital menus** → **DO NOW** as a \$150–300 add-on (now shipped). Trivial to build, raises the ticket, gives the closer a visual yes.
- **Build-your-own online ordering** → **SKIP**. It's an ops/liability business (PCI, kitchen routing, 7pm support calls) — breaks the model.
- **Resell Square's free ordering** → **LATER**, as a setup-fee upsell once there's revenue. Never a custom build.

YOU What needs Nate — the only 4 things

1

Fresh Stripe key. The current secret key is dead — it blocks payment links and the first close. ~60s at dashboard.stripe.com/apikeys, then paste it to Claude.

2

Sign peak11media into Chrome. Unlocks Google Drive (file delivery + backups) and Webild access for builds.

3

Close the Avalanche / Alex deal. The Avalanche Roofing demo is built and live (GAF, A+ BBB, 4.9★) — Alex is the warmest target. Close it.

4

Approve outreach + start dialing. 23 emails are drafted and the call sheet is loaded. On your green light, the email blast and call blocks fire together.

Everything else — the demos, playbooks, leads, CRM, financials, contracts, and the QR add-on — is built, verified, and waiting in the Peak 11 HQ dashboard. The machine is ready; it just needs the key turned.
